

Admin Area Setup

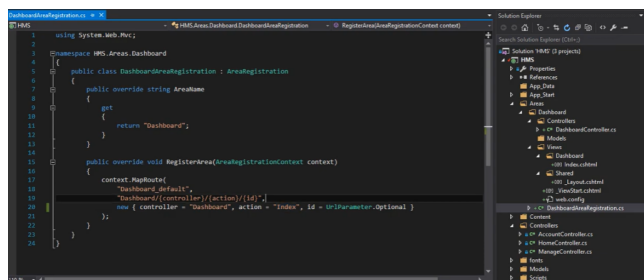

07 September 2023 12:38

We can create a area for different different modules like (Dashboard, Admin, User) so everything related to module is separate separate Area.

Create Area in HMS project Dashboard

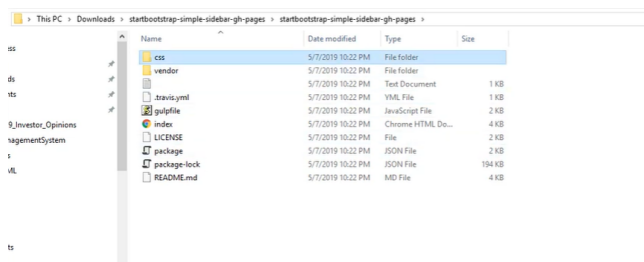

Create a controller inside of the Area Dashboard and create view and we can use separately here

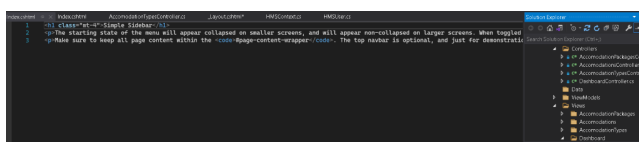

Download the template layout from the startbootstrap.com

<https://startbootstrap.com/template/simple-side-bar>

Copy the css and vendor file from the downloaded location

Create a new folder in Dashboard Area with name Content and paste the copied content
